

CIVIL AIRCRAFT REGISTERS OF HONDURAS

PREFACE;

The information shown here is from official reports, production histories, and sightings around the world.

To show maximum respect to the Honduran Authorities names, addresses details of private owners are only included where this information has been submitted to BV or similar. Where names of airlines or operators are shown it is where the aircraft has been marked and/or operated with titles, which are in effect in the public domain by their existence.

The aim of this project is to encourage interest in the history of aviation in Honduras and to develop a good relationship with the relevant authorities. I hope the presentation of this material will be taken in the positive spirit it is intended. Any observations, additions, and corrections are very welcome to: gjd16175@yahoo.co.uk
