| 284 | Apr 60 |

**Notes**

mh-1521.fr shows pre-production aircraft with a P prefix to the c/n.

Sipa fuselage numbers not used in order

Information in yellow is either incomplete or not confirmed

Dates in brackets are noted dates in photographs on the mh-1521.fr website

Information on Argentine Police MH.1521 is believed correct from Argentine websites

Not forgetting "French Military Aviation" by Paul. A. Jackson, published by Midland Counties for the older French military codes.

Second edition 1979 refers

**C/N PLATE LOCATIONS**

**There can be 3 c/n plates affixed to the MH1521.**

The **FIRST** one is the SIPA Aviation centre/rear fuselage number which is normally affixed to the port fuselage side in this location:-

It looks like this: \_

The **SECOND** is the Max Holste plate located inside the fuselage on the starboard wing root at co-pilot head height and can be photographed through the port cockpit triangular window if legitimate access is available.

Note that there are 2 Max Holste plates on this occasion, one quoting "185", the other quoting "185M", the upper plate appears to be the original, the lower appears to be affixed after a major overhaul in 1968.

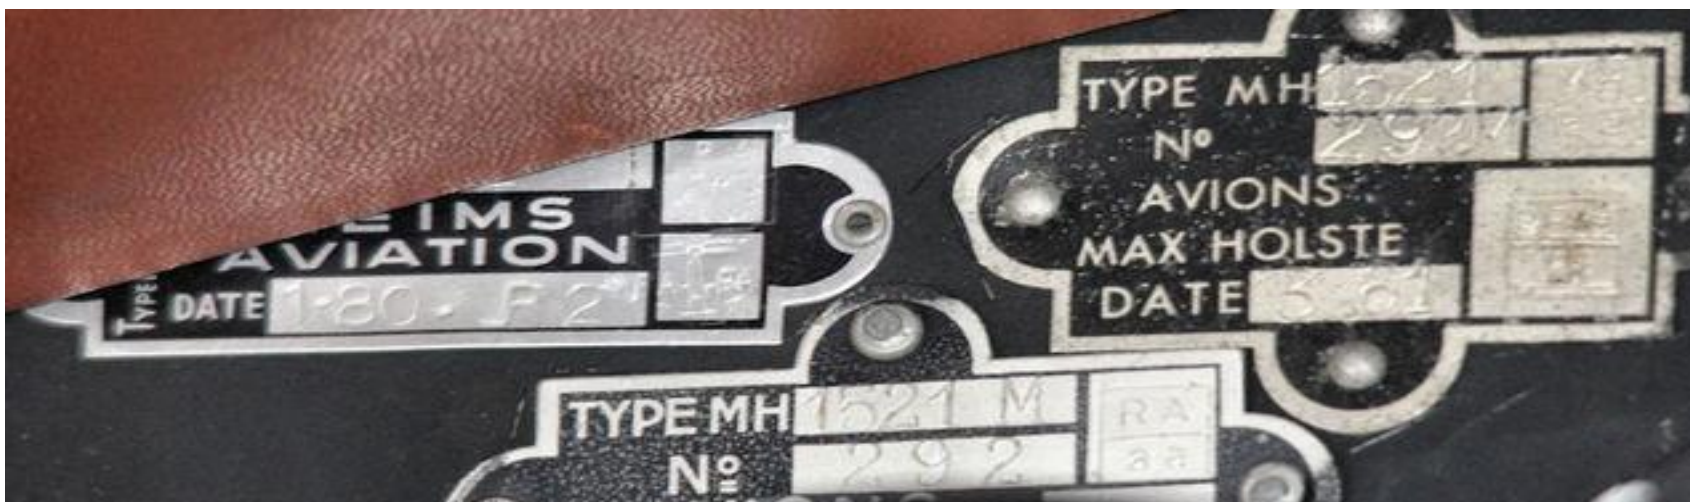

Also in the above photo is the **THIRD** type of plate, the Reims Aviation plates, applied at each major overhaul, in this case twice, the first with an R suffix after the date, the second with and R2 suffix.

Note that there is only one out of 4 plates with the M suffix, thus it appears that these aircraft were widely identified without the suffix.

To catch the unwary, the Holste plate on 255M above has been oversprayed, probably during the first major overhaul by Reims Aviation. However, the one below from 292 also with 4 mounting holes is black and silver as expected. Again, please note that the earlier Holste plate shows "292M" whereas the later plate shows just "292".

**Credit for all these photos goes to Paul Jackson.**
